

OFFICIALS CONSULT IN SECRET

Director Stubbs and His Associates Inspect Local Railroad Conditions.

Little late last night the high traffic officials of the Harriman system were closeted in close conference with the chiefs of the traffic department in W. H. Banister's office. At the close of the conference, it was learned that the officials had nothing to give out to the public, that, in fact, nothing was being done to change the conditions of any public interest. It was said that there were no changes in the local traffic department to be reported.

of the subjects that was debated the sugar rate question. It is in some quarters that there are some alterations made in these rates. Salt Lake man, however, is very much on the inside in all matters pertaining to the sugar industry. There was nothing to be done because the local rates on sugar are satisfactory—at least low enough to enable the sugar company to profit.

Following the revised rates, the Green River to Reno section of the Harriman system is to be operated in conjunction with the Oregon Short Line proper. This is a very radical change, but in order to operate the territory as a unit with the tariff of freight being made up to equalize the cost of expenditure and income of the Oregon Short Line, the tariff of freight for passenger traffic was thought to have been made up to equalize the cost of expenditure and income of the Oregon Short Line.

RATE WAR IS DECLARED OFF

May 6.—After many futile efforts the Western railroads have agreed to make proportionate rates from all Missouri river points to Chicago and St. Louis. The rates from Nebraska points to St. Louis will be the same as those from Missouri points. The rates from Nebraska points to Chicago will be the same as those from Missouri points. The rates from Nebraska points to St. Louis will be the same as those from Missouri points. The rates from Nebraska points to Chicago will be the same as those from Missouri points.
